

NEW
**RENAULT
MASTER**

accessories

designed for efficiency

New Renault Master is ushering in a new era for utility vehicles by becoming the aerovan. Enjoy the wide range of accessories available for adapting it to the daily demands of your business.

customise your comfort

Discover our accessories for a passenger compartment that combines functionality, comfort and practicality.

Attached with safety clips, resistant to dirt and easy to maintain, the floor mats provide you with protection and comfort. They are available in rubber or fabric and are made to measure.

rubber floor mats

fabric floor mat

Seat covers that protect the original upholstery from wear and dirt. Removable smartphone holder that allows you to use your phone fully and safely during your journeys. Finally, the cool box to keep meals and drinks at the right temperature.

12 V-220 V cool box

optimise the roof storage

Carry up to 160 kg⁽¹⁾ more by fitting the new Renault Master with a roof rack, a rear ladder for access and a walkway for safe loading. Designed as a deflector, the cross member design helps to reduce aerodynamic noise.

Fit up to 5 Renault roof bars⁽²⁾ to increase your vehicle's loading capacity. You can carry your professional equipment – such as a signage kit and ladders.

roof rack, walkway and a ladder

roof bars⁽²⁾

(1) for version L2.

(2) a 5th bar is available for L3.

tow without worry

Capable of towing up to 2.5 tonnes – the best performance in its category – the new Renault Master has various towing systems to meet all requirements.

The standard towbar pack with ball joint or the 4-hole mixed hook are solutions for towing your loads that meet the best safety standards.

standard coupling and 4-hole mixed hook

Fitted with a ball joint or drawbar, Renault towbar packs are 100% compatible with Renault Master and there is no risk of their being distorted. For maximum flexibility, opt for the towbar with drawbar pack. You can then tow a ring or ball-joint trailer.

standard towbar with ball joint

drawbar yoke

protect your vehicle

Secure your new Renault Master and whatever it is carrying by fitting it with a surveillance alarm. Its detection systems prevent any attempt open, break in or move whatever is in the loading area.

By installing mud flaps and/or wheel arch protections, prevent gravel and mud causing damage to your vehicle's underbody.

front and rear mudguards

front and rear wheel arch protections

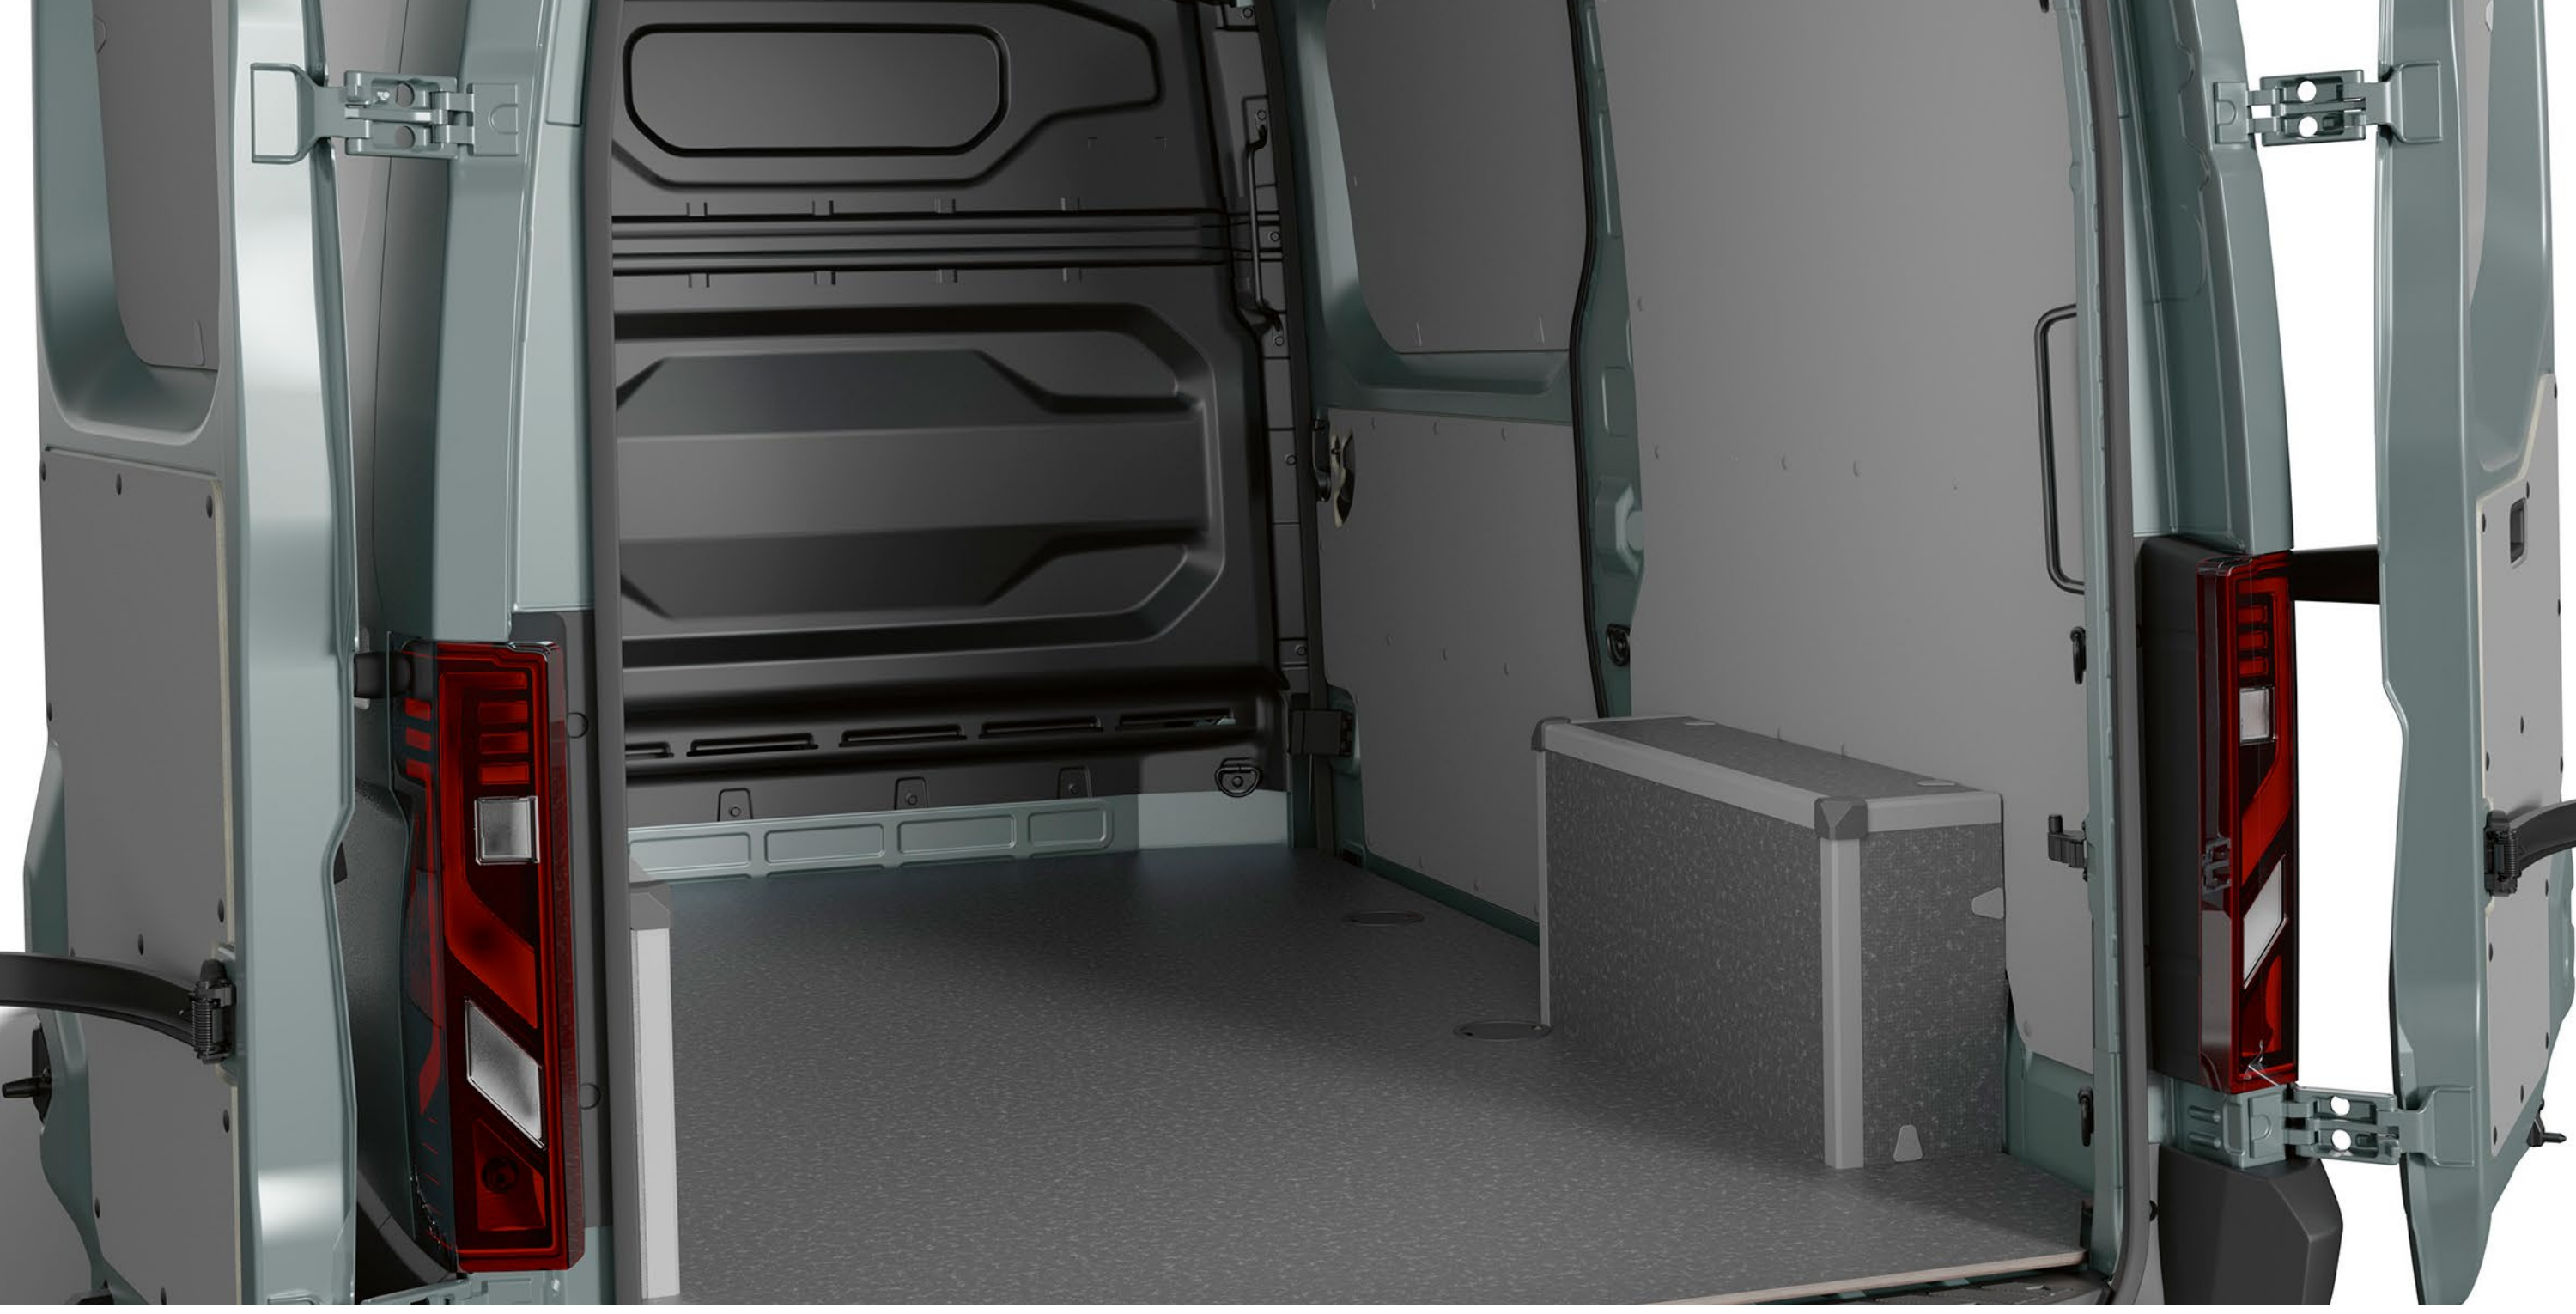

reinforce your Master

Bring all kinds of materials into the loading area thanks to our range of bespoke trims available in 3 finishes – standard, innovation and premium. Each part has reinforced aluminium protections, cups and corners.

Also save time thanks to our customised fittings. Depending on your needs, linear shelves and open or closed lockers offer the best solutions for keeping your tools and equipment neatly tidy.

Premium grey finish: high-strength birch trim with 12 mm non-slip floor for improved durability. Recommended for intensive use, including with chemicals or in a wet environment.

premium grey wood trim

Innovative finish: washable, moisture-resistant and up to 65% lighter than wood. Ideal for maximising the range of an electric vehicle.

innovation polypropylene trim

Standard wood finish: the quality of poplar wood for sturdy trim with a 12 mm wooden floor. Especially suitable for standard use in a dry environment.

standard poplar wood trim

Customise your loading area with linear shelves and open or closed lockers. Practical and straightforward to install, they will keep your equipment tidy and within easy reach.

front and left rear lockers, with shelves, open compartments and closable hatches

shelving on the right in the rear

work safely

Class A or B marking strips identify your service vehicles travelling on public roads in compliance with regulations. Effectively signal your presence while you are carrying out work with the triflash triangle and two additional flashing lights.

marker strips and triflash triangle together with two additional flashing lights

If needed, our European-compliant fire extinguisher is within easy reach of the driver thanks to our crash-tested mount and fits perfectly into the passenger compartment.

fire extinguisher with secure attachment system

easy charging

Electric mobility is even easier with the right accessories.

The cable holder handle, essential for carefully handling your charging cables without unwinding them.

Take advantage of the flexicharger cable that can be used with a reinforced domestic socket (3 h 55 for 50 km), and/or occasionally the domestic cable adapted for use with standard sockets (6 h 28 for 50 km). The type 2 charging cable, for long journeys, is used with public and domestic charging stations.
